

alignrt[®] InBore[™]

AN SGRT SOLUTION FOR USE WITH HALCYON[™] AND ETHOS[™] LINEAR ACCELERATORS

**SET UP OUTSIDE.
TRACK INSIDE.**

SUPERCARGE YOUR THROUGHPUT

Published evidence showing faster total treatment time¹

MONITOR TREATMENT POSITION

Miniaturized AlignRT cameras ensure patient safety throughout procedure

ENABLE BREATH-HOLD PROCEDURES

Intrafraction in-bore 6DoF monitoring² enables new treatments including DIBH

"AlignRT InBore allows us to combine the benefits of fast CBCT, high dose rate and continuous monitoring of patient motion to perform safe DIBH treatments"

Daniel Nguyen, Medical Physicist, Orlam Group

SGRT WITHOUT COMPROMISE

Our smallest-ever
AlignRT cameras

No impact on the linac
workflow or serviceability³

Projection system
invisible to patients

Low 12mm profile

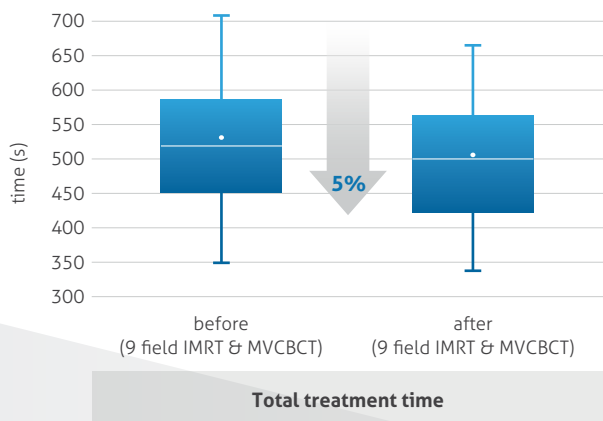

Single cable connection
independent of linac

Quick and easy to
mount within the bore

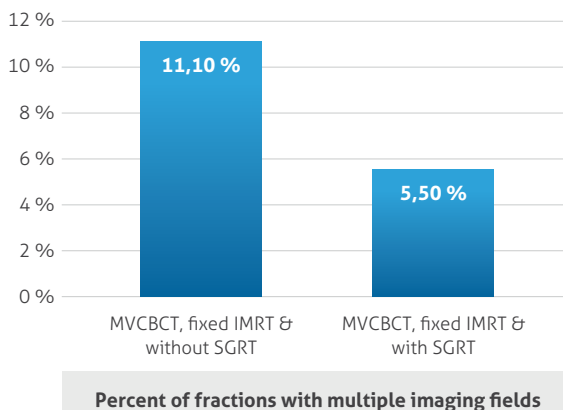

Enables 6DoF
intrafraction motion
monitoring, including
DIBH and stereotactic
treatments

PUBLISHED EVIDENCE SHOWING FASTER SETUP AND REDUCED REPEAT IMAGING¹

Mean total treatment **time reduced by 5%** after AlignRT implementation¹

Up to **50% reduction** in the number of fractions requiring setup correction and additional imaging fields¹
